## Smart Door Lock Price in Bangladesh: Order Now For Enhanced Security and Convenience | [zymak.com.bd](http://zymak.com.bd)

### Introduction to the smart door lock technology

In today's digital era, smart home technology has revolutionized the way we secure our homes. Among the various smart home devices available, **smart door locks** have gained huge popularity due to the advanced security features and convenience these door locks offer. Nowadays, interior design and home renovation are very common in BD. Almost everyone wants to stay ahead of technology and decorate their homes. However, smart door locks can offer other benefits beyond decoration. In fact, these door locks can enhance your home security and also make your life easier. Thus, smart door locks are not just a luxury but a necessity. In this article, we will compare the **price of smart door locks in Bangladesh** and provide a detailed overview of the different unlocking methods, such as fingerprint, password, RFID card, key, and app-based unlocking.

# Smart Door Lock Price in Bangladesh

When it comes to **smart door lock prices in Bangladesh**, Zymak BD offers a range of options to suit your budget and requirements. The prices may vary based on the brand, model, features, and functionality of the smart door lock. Let's compare the different types of **smart door lock prices in BD**.

## Fingerprint Door Lock Price in BD/Bangladesh

**Fingerprint door locks** rank among the most secure and convenient **door locks in BD**. These door locks use biometric technology and can be unlocked using your fingerprint. Because of the biometric technology, these locks are also known as **Biometric Door Locks**. Just press your thumb on the fingerprint recognition panel and the door is unlocked. It's that easy! There is no hassle of carrying any keys or remembering the password. **Fingerprint door lock price in BD** starts from BDT 9000 and can go upto 30,000 Taka. The price can vary depending on the brand, specifications, and unlock options available. Some popular brands offering **fingerprint door locks in Bangladesh** include **ZKTeco, Tuya, Smart Life, SmartX, RFL, Xiaomi, and Zymak**. Among these brands, ZKTeco and Xiaomi are often overpriced due to their brand value and popularity. However, if you have a limited budget and looking for more affordable alternatives, you can also explore other brands. Other brands can also offer similar unlocking options at a much lower price point. Here at **Zymak BD**, we offer a wide variety of **fingerprint door locks at the most competitive prices**. Feel free to browse our collection and compare the **fingerprint door locks price in Bangladesh**.

### Why You Should Buy a Fingerprint Door Lock?

Fingerprint door locks are not just a luxury but a necessity. When compared to traditional door locks, fingerprint door locks excel in all aspects. If you're using a standard door lock, you have to deal with the inconvenience of carrying physical keys while also worrying about your keys getting lost. However, with a fingerprint door lock, you don't need to carry any keys; you can simply unlock the door using your fingerprint. This significantly simplifies your daily life and eliminates hassle. These **biometric door locks** are also highly convenient for

multi-user access by allowing multiple fingerprints to be registered. Buying a **fingerprint door lock** can be a lifesaver if you have multiple family members. You can easily register the fingerprints of all your family members, granting them seamless access to the door lock.

## Password Door Lock Price in BD/Bangladesh

**Password door locks** provide an alternative unlocking method using a unique **digital password or PIN**. These locks are easy to set up and can be unlocked by entering the correct password. Often, the password is numeric, so these **smart door locks** are also known as **digital door locks**. The **prices of password door locks in Bangladesh** start from BDT 7000 and are usually much cheaper than fingerprint door locks. Now, let's discuss the advantages and disadvantages of **fingerprint and digital door locks in BD**.

### Fingerprint Door Lock vs Password Door Lock

Both types of door locks stand out from traditional/standard door locks by eliminating the need for a physical key. However, if you are concerned about the security of your home and want to buy a safer and more convenient door lock, then **fingerprint door locks** are the right choice. Fingerprint door locks can only be unlocked by the fingerprints registered to the system, ensuring that an authorized person must be present. There is no chance for anyone else to be able to unlock the door. On the other hand, with a **password or digital door lock**, anyone who knows the password can unlock the door. Therefore, **password door locks** lack security when compared to **fingerprint door locks**. With a fingerprint door lock, you can unlock it in front of anyone, but with a **digital or password door lock**, you have to type the password secretly so that no one else knows it.

## RFID Card Door Locks or Hotel Door Locks Available In BD

RFID card unlocking is another convenient method provided by **smart door locks**. These locks come with RFID card readers that allow users to unlock the door by waving or tapping an authorized card. These **types of door locks** are very common in hotels and resorts; hence, **RFID card door locks** are also known as **hotel door locks**. The **prices for RFID card smart door locks in Bangladesh** start from 6500 TK. Reputable brands such as Zymak offer reliable RFID card unlocking options. If you are looking for a **hotel door lock**, RFID card door locks can be the best choice. RFID technology is quite similar to **NFC and IC card technology**. We also have door locks with NFC or IC card unlock. Check our website and compare the **prices of hotel door locks in BD**.

## Key Unlock Mortise Door Locks In Bangladesh

Traditional key unlocking is still a backup feature available in **smart door locks**. In case the batteries run out of power or if the electronic lock system is not functioning properly, users can unlock the door with a physical key. **Door lock prices in Bangladesh** can vary depending on the design and durability of the mortise lock. Usually, the **prices of door locks in BD** start from 800 taka and can go up to 3500 BDT. **Bedroom door locks** are usually cheaper than **main door locks**. This is because main door locks are often larger, and heavier, and use high-security mortise locks.

## App Unlock Door Locks From Zymak

With the rise of **smart home systems**, many **smart door locks** can now be unlocked using dedicated mobile apps. Apps such as **Tuya, Smart Life, and TT Lock** app provide convenient control and monitoring features. **App unlock smart door locks** is available in **Bangladesh** at prices starting from BDT 7500. **Smart door locks with app unlock** can offer many security benefits. For example, you can generate OTP (One-Time Password) directly from the app and share it with your guests, set the door lock operation time, remotely unlock the door via Wi-Fi or Bluetooth, configure the smart door lock, and do much more using the smart door lock app. In fact, some apps can also be connected to **Amazon Alexa** and **Google Home devices**, adding more functionality.

## Smart Door Lock with Camera

Experience advanced security and convenience with a smart door lock equipped with a built-in camera in **Bangladesh**. This all-in-one device serves

as a video doorbell and door camera, providing enhanced security and monitoring capabilities.

**Smart door locks with camera prices in Bangladesh** typically start from BDT 12500. While the **price of a door camera in BD** starts from 5000 Taka and can go as high as 15000 BDT. When you consider the value and price ratio, investing in a smart door lock with an integrated camera proves to be a more sensible choice compared to purchasing a separate **door camera or video doorbell**.

## Why you should buy Smart Door Locks?

### **Auto Lock**

The first and most common feature of a smart door lock is the auto lock function. This function is available in all **smart door locks in Bangladesh**. It is an essential feature that can make your life hassle-free and give you peace of mind. With normal door locks, we always have to worry about whether we have locked the door or not. But with smart door locks, we do not need to bother about locking the door. Smart door locks have the auto lock function.

### **Key Is Not Mandatory**

For a standard door lock, you must have the keys to unlock the door. However, with **smart door locks**, using the key is not mandatory. All smart door locks can be unlocked without the need for a physical key. You can simply use your fingerprint, type your password, or tap the RFID card to unlock the door. You will only need the keys in case the batteries run out of power or if the electronic lock stops functioning. So there is no need to carry the keys all the time, and you no longer have to worry about losing them.

### **Multi-User Access**

Standard door locks usually come with 2 or 4 keys included. This means that only 2 or 4 people can unlock the door. However, with a smart door lock, hundreds of users can be registered and given access to the door lock. So if you have multiple family members in your home or if you are thinking of buying a door lock for an office, smart door locks can meet your requirements. Imagine you left your home without the keys, and when you return home, no one is inside to unlock the door. Smart door locks can be a lifesaver in that situation because you don't need the keys to unlock them. So you can unlock the door and enter your home.

### **Secured and Convenient**

Compared to standard door locks, **fingerprint door locks** are much more secure and convenient. The security benefits and convenience of **smart door locks** have already been mentioned throughout the article. We have also mentioned the prices of various **types of door locks in Bangladesh**. Now, if

you **compare the price of a standard door lock with a smart door lock**, the price difference is not much. It means you can buy a smart door lock with only a slight increase in your budget. Hence, **smart door locks are completely worth the price** and offer great value for money.
